

## ENVIRONMENTAL POLICY STATEMENT

At Astrosyn International Technology Ltd, we are committed to conducting our business in an environmentally responsible manner, ensuring the protection and sustainability of the environment. We prioritize the use of recyclable materials to support the natural replenishment of the Earth's resources.

Our goals are:

1. **Sustainable Materials:** To utilize materials that do not pose harm to the environment during disposal and to ensure that no employee is exposed to hazardous conditions that may jeopardize their health and safety.
2. **Environmental Consideration:** We will consistently evaluate the environmental impact of our activities, products, and services, taking into account the well-being of customers, users, the general public, and employees.
3. **Waste Reduction:** We are dedicated to minimizing waste generation and reducing unnecessary fuel and energy consumption in the normal course of business operations.
4. **Eco-friendly Product Design:** Whenever possible, we will consider the environmental impact of product design, including aspects related to production, use, and disposal, to minimize our ecological footprint.
5. **Supplier Collaboration:** We encourage our suppliers to adopt environmentally friendly practices, using materials and products that are recyclable and sustainable.
6. **Employee Engagement:** This policy has been communicated to all employees, who are encouraged to identify opportunities for environmental improvements within the company. Employees are also invited to share any innovative ideas with management for consideration in long-term environmental planning, with the goal to comply with the requirements of ISO 14001.

We remain fully committed to continually enhancing our environmental performance and ensuring the long-term sustainability of both our business and the planet.
